-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3683

1. The disclosure is objected to because of the following informalities: there is no such word as "brakable" as in claim 12, line 2..

Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Humphreys et al. in view of Ralea et al.

Humphreys et al. show a braking system comprising wear detectors for the wheels of a vehicle and a display system that shows the amount of wear on each wheel, see fig 4. the claimed invention differs from Humphreys et al only in the inclusion of a memory storage medium. Ralea et al show a wear monitoring system for brakes including the storage of the wear signals, see column 6, lines 55 et seq.

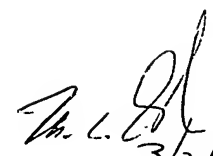

It would have been obvious to one of ordinary skill in the art to have including a memory storage in the ECU of Humphreys et al. in view of the teaching of Ralea et al so as to more accurately monitor brake wear characteristics as taught by Ralea et al.

Re- claims 2-2, the commonplace features recited are shown in the cited references and/or are well known as commonplace features in a vehicle.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Carnegie, Webberly, Jarzombeck, Thomason, Reinecke, Johnson, Matos et al and Fuglewicz et al show brake wear systems.
